

## **Clinic Flow Protocol for ROR program**

Age: 6 months-5 years

Visit: Well Child visit

### **Clinic Flow**

Clinic administrative staff flags the age of the child for Well Child Visits

6 months – 5 years of age

Medical Assistants gets the age appropriate book, rooms the patient and gives them a 3 question survey to be completed at the end of the visit.

Book along with the chart is placed in the box outside the room

Resident physician picks up the book from the box goes inside and gives the book to the family. He/she also talks about good reading habits and other healthy habits.

Family fills up the three question survey- Medical Assistant/Nurse collects it. These surveys are then scored by the QI team
