

Appendix 8 – Additional figure

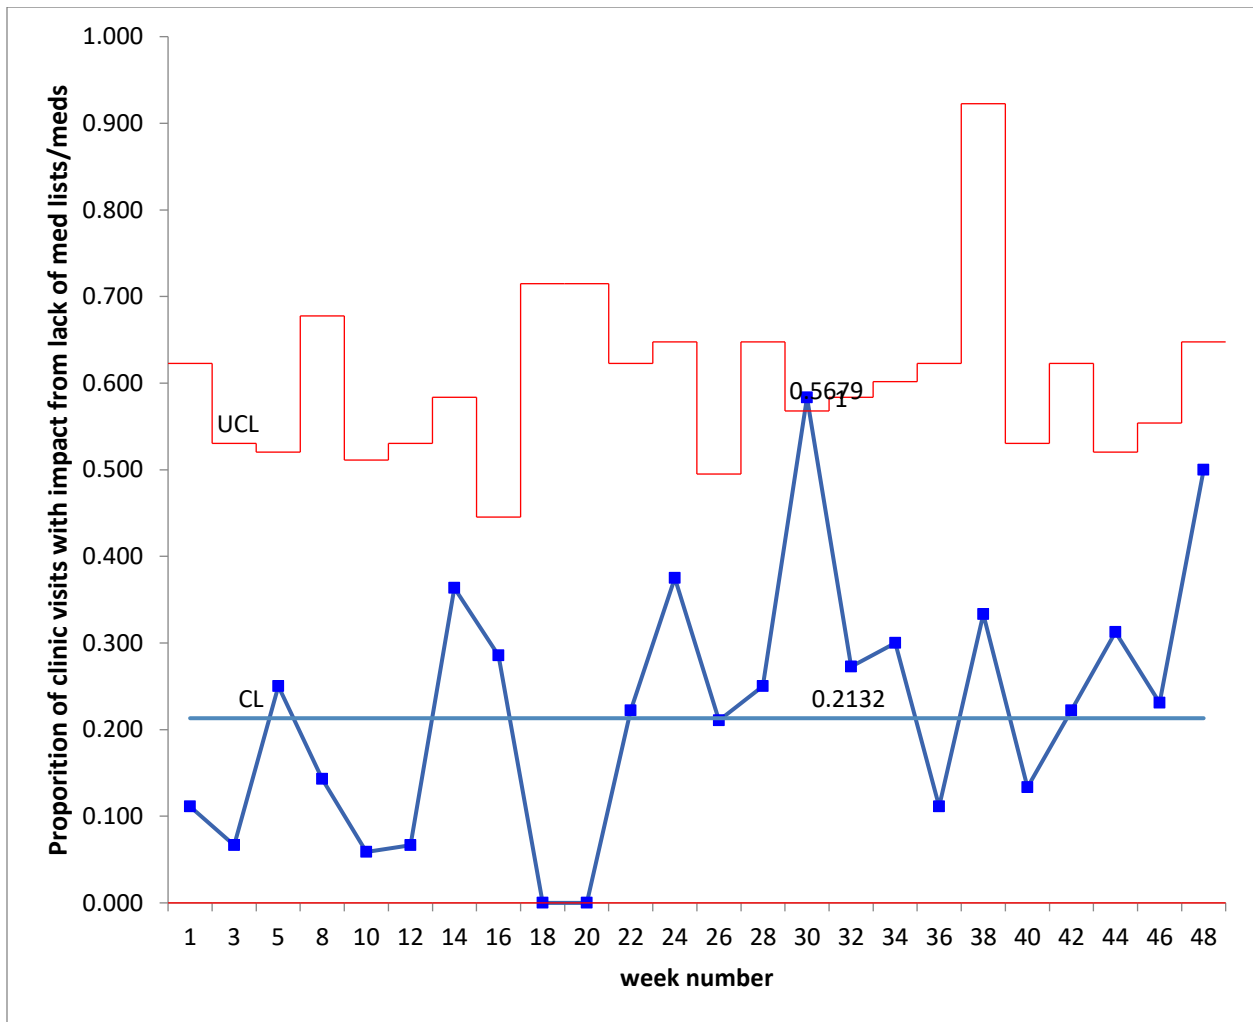

Figure 4. P-chart - the proportion of patients whose clinic visit was impacted by not having brought their medications/medication lists from Nov 14th, 2016 – Oct 20th, 2017 in the Spasticity clinic. . One point above the upper control limit was observed during Week 30/31. Each data point represented an average of 12.3 patients per 2-week interval. The red lines represent the upper and lower control limits, and the blue line represent the control limit
