

Supplementary Figure 3: The linear regression used to generate a cumulative supply equation for phenoxymethylpenicillin prescriptions ($r = 0.999$, $p < 0.005$) in clusters without pharmacies piloting the Sore Throat Test and Treat (STTT) service (non-STTT clusters), with data from October 2016 (month 1). The graph includes predicted and actual prescriptions for phenoxymethylpenicillin pre- (months 1 to 25) and post- (months 26 to 30) STTT intervention
