Appendix 3 - Percentage Compliance with Appropriate Care

The graph shows the percentage compliance with appropriate care over time, with key interventions and their associated percentage compliance highlighted. The interventions include:

- Shared tool in daily pediatric department huddles (48%)
- Nurse reminders to pediatricians (33%)
- Simplification of health records (32%)
- Engaged RMOs (42%)
- Promoted early adopters, tested local leadership (43%)
- Dedicated pool of locum pediatricians, retained triaging supervisor (20%)
- Busiest footfall (19%)
- Tested tool in morning shift (16%)

The median compliance percentages are as follows:

- Median: 30%
- Median: 50%
- Median: 63%

The data is collected weekly from November 2015 to December 2018, with peaks and troughs indicating the effectiveness of the interventions over time.
