Figure 1- Fish Bone Diagram
Causes of unstructured ward round notes by pediatricians

Resource
- Multiplicity of task and responsibility
- Less focus on documentation
- Less time per patient due to high case load
- Inherent inclination to prioritize hands on clinical work versus record keeping

Process
- No pre-defined template to ensure all clinical information is recorded
- No focused audits done to assess the content of ward round notes

System
- Unstructured ward round notes by pediatricians
- Inconsistency in reporting of patient clinical information
- Personal experience and training influenced commitment towards record keeping
