

Appendix 1

List of free-text questions from Worksheets 1-3

The questions that were included in our analysis are written in cursive. Due to a very large material, a selection of which material to include had to be done. When reading through the full material, it became evident that the replies to the questions that were included in all three worksheets were very similar and revealed little new information. We therefore opted to include the feedback on the e-learning module and the peer group discussion from only one worksheet. We included the feedback on the prescription reports for both module 2 and 3, as we expected that the reactions could be slightly different when the participants observed their change over time. The prescription report in module 1 was an example report without individual data, we therefore chose to omit this question from worksheet 1. Other feedback was included for all three worksheets. The questions that did not pertain to the aim of our study were not included in the analyses.

Worksheet 1

What do you see as your potential for improvement? Try to formulate a goal for improvement regarding antibiotic prescriptions.

Which items from the prescription report can be followed to see whether your goal is achieved?

Which measure(s) do you believe will give measurable improvement? Choose between the improvement tools that have been presented, or other measures you want to use.

Feed-back on e-learning module 1

Feed-back on the prescription report

Tilbakemelding på forskrivningsrapporten

Feedback on the peer group discussion

Do you have other feed-back?

Worksheet 2

Describe measures (if any) that you have implemented since the last meeting. Consider if this measure should be a standard part of your practice, or if it should be rejected.

New measures. When you receive your individual prescription report, new improvement potentials may appear. What do you want to improve? Try to be specific.

Which items from the prescription report can be followed to see whether your goal is achieved?

Which measure(s) do you now believe will give measurable improvement? Choose between the improvement tools that have been presented, or other measures you want to use.

Feed-back on e-learning module 2.

Feed-back on the prescription report.

Feedback on the peer group discussion

Do you have other feed-back?

Worksheet 3

Describe the measure(s) that worked best in your practice.

How will you make sure that the improvement measure is used in your future practice as well?

New goals and measures. When you receive your second prescription report, new improvement potentials may appear. What do you want to improve? Will you try new improvement measures?

Feed-back on e-learning module 3

Tilbakemelding på e-læringsmodul 3

Feedback on the second prescription report.

Feedback on the peer group discussion

Do you have other feedback?
